DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 16-26 and 29, drawn to a method for protecting body care product from photolytic degradation utilizing a benzotriazole of formula 1.

Group II, claim(s) 16-26 and 29, drawn to a method for protecting body care product from photolytic degradation utilizing a triazine compound of formula 2.

Group III, claim(s) 16-26 and 29, drawn to a method for protecting body care product from photolytic degradation utilizing a benzotriazole of formula 1 and a triazine compound of formula 2.

Group IV, claim(s) 16-30, drawn to a method for protecting household product from photolytic degradation and for preparing household product utilizing a benzotriazole of formula 1.

Group V, claim(s) 16-30, drawn to a method for protecting household product from photolytic degradation and for preparing household product utilizing a triazine compound of formula 2.

Group VI, claim(s) 16-30, drawn to a method for protecting household product from photolytic degradation and for preparing household product utilizing a benzotriazole of formula 1 and a triazine compound of formula 2.

Art Unit: 1616

2. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The compounds defined by the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The compounds of the claims contain a benzotriazole or a triazine ring system, which does not define a contribution over the prior art. The substituents on the ring structures vary extensively and when taken as a whole result in vastly different compounds. Accordingly, unity of invention is lacking and restriction of the invention in accordance with the rules of unity of invention is proper.

3. Applicant is required, in reply to this action, to elect a single species from under the elected Group for search purposes. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1616

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
